

I drive a truck and need, and have for a long time, weather and traffic information that "XM Radio" provides. I can know the weather in a city 2-3 hundred miles away and plan my route to miss any bad weather or traffic, this is something the "NAB" can not give me at any price, although I do pay a fee to XM it's worth every cent. I therefore I ask you to reject petition 04-160 and help keep this united states the land of the FREE.
